

(FABRIQUÉ EN FRANCE)
MADE IN FRANCE

Entirely designed and developed by Elipson's designers and engineers, the Alpha 100 turntable is a concentrate of technology and innovation. Its PVC chassis has a black matt finish, and the pressed steel plate is covered with a felt to gently accommodate the record. The motor speed is obtained by a digital frequency generator which allows you to switch between 33 and 45 rpm, and ensures a constant speed. The motor is sustained to prevent any vibration in the turntable, the tonearm or the cartridge. The aluminium OTT tonearm developed by Elipson is equipped with Ortofon OM10 cartridge and anti-skating. It has a very low friction for precise tracking.

SPECIFICATIONS

Chassis : Black matt PVC
Plate : Pressed steel
Tonearm : Aluminium
Cartridge : Ortofon OM10
Centralizer : Polyamid
RCA cable provided
Compatible with MM/MC cartridges

Dimensions : W450 x H120 x D380 mm
Weight : 5 kg

DEEE :

Packaging : W585 x H275 x D465 mm
Weight : 6,8 kg
