

(FABRIQUÉ EN FRANCE)
MADE IN FRANCE

Entirely designed and developed by Elipson's designers and engineers, the Omega 100 turntable is a concentrate of technology and innovation.

Its PMMA chassis has a stunning black, red or white lacquer finish, and provides excellent rigidity and better neutrality. The motor speed is obtained by a digital frequency generator which allows you to switch between 33 and 45 rpm, and ensures a constant speed. The motor is sustained to prevent any vibration in the turntable, the tonearm or the cartridge. The carbon OTT tonearm developed by Elipson is equipped with Ortofon OM10 cartridge and anti-skating, and allows a better stiffness and less resonance.

SPECIFICATIONS

Chassis : lacquered PMMA
Plate : Pressed steel
Tonearm : Carbon
Cartridge : Ortofon OM10
Centralizer : Aluminium
RCA cable provided
Compatible with MM/MC cartridges

Dimensions : W450 x H120 x D380 mm
Weight : 5,8 kg

DEEE :

Packaging : W585 x H275 x D465 mm
Weight : 7,6 kg
